

JOB POSTING

Habitat Technicians (3)

LOCATION: Sussex, NB

TERMS: Seasonal, full time, with possibility of extension

ANTICIPATED START DATE:
May 15, 2023

SALARY: \$14.50/hr

EDUCATION: High school, college or university.

JOB SKILLS: Comfortable wearing waders and working with various tools while around water. Physically capable and at home outdoors with an ability to work as part of a team in all types of weather conditions.

- Willing to learn new skills.
- Strong observational and navigation skills.
- Experience with various water monitoring tools and equipment is an asset.

JOB DESCRIPTION: Working as part of the habitat restoration crew, the habitat tech will learn new skills in an outdoor environment, which comes with swarms of mosquitoes and all kinds of weather conditions. Habitat techs can expect to appear in social media posts as we keep our followers updated. Completing general site and sign maintenance and assisting in the installation of various habitat enhancement structures including duck/bird boxes, pollinator gardens, and aquatic habitat structures will be a big part of your work. As a team member you will also assist in hosting public engagement events, educational workshops, and site tours. When working with the monitoring team you'll collect samples, deploy sampling devices, and more.

CONDITIONS OF EMPLOYMENT:
Contract position for 40 hours per week
Seasonal
