

## **JOB POSTING**

### **Mapping/Data Technician**

---

**LOCATION:** Sussex, NB

**TERMS:** Seasonal, full time, with possibility of extension

**ANTICIPATED START DATE:**  
May 13, 2024

**SALARY:** \$16.00/hr

**EDUCATION:** College or university.

**JOB SKILLS:** Candidate must possess a strong knowledge of file and data transfers from hard drive to online folder systems. Must have GIS and map development skill sets (ARC/Basecamp/GPS/Google Earth). The candidate must be highly organized, a strong communicator, and comfortable working in a team environment. A background in the natural sciences would be beneficial but not necessary for the right candidate.

**JOB DESCRIPTION:** Working under the Project Manager the Mapping/Data Technician will pull data files into a common file and develop open-source map layers to geographically display various data sets and tell our restoration story. Working with Microsoft Office products, Garmin, Basecamp, and online mapping tools will be crucial to the success of the projects.

**CONDITIONS OF EMPLOYMENT:**  
Monday-Friday 8:00am – 4:30pm  
Contract position for 40 hours per week for 10 weeks

**EMPLOYER:** Kennebecasis Watershed Restoration Committee

**APPLY VIA E-MAIL:** [ben.whalen@kennebecasisriver.org](mailto:ben.whalen@kennebecasisriver.org)
